How to be "Green" When Printing from Your PC

Here's a tip from Professional Nerds™ on how to be more "green" (earth-friendly) while saving yourself some "green" (\$\$\$).

Check out "Greenprint World" at <http://printgreener.com>. It's a free PC/Mac printer "driver" (supported by banner ads) that allows you to preview print output from any program. Before you print to paper, you also have the option of saving your output as an Acrobat PDF file, which then can be printed or e-mailed. Greenprint World also tallies how much paper (and ink) you've saved, as well as your own personal CO₂ based on the savings.

Don't Believe Everything You Read Online.

Looking to disprove or confirm those e-mail warnings your friends send you? Visit www.snopes.com, the urban legend site that features accurate information on just about every urban legend in circulation, and whether or not there's any truth to the urban legend.

"Rain, Rain, Go Away . . ." or "Twisting the Night Away . . ."

Storm season and tornado season are here. The best way to prevent injury resulting from a tornado is to stay alert. Pay attention to weather conditions. Visit *The Tornado Project Online* (www.tornadoproject.com) or The National Severe Storms Laboratory (www.nssl.noaa.gov) for accurate safety information.

- Remember, a **tornado watch** means that conditions exist that can produce a tornado.
- A **tornado warning** means that a tornado has been spotted and you should seek immediate shelter.

Buying Airline Tickets?

Summer vacations are coming up. Buying airline tickets online is a
